

Index to Volume 36

- Amakawa, H., and Austern, N.—
Comparison of DWBA and adiabatic
treatments of deuteron breakup angular
correlations 633
- Amos, K.—
See Di Marzio, F. 135
- Anderson, M. R.—
See Sevier, M. E. 463
- Applied physics*
Flow distribution in parallel connected
manifolds for evacuated tubular solar
collectors 197
Lamp for cancer phototherapy 221
- Aryafar, M.—
See Ganas, P. S. 659
- Astronomy and astrophysics*
Atlas of main-line OH masers in the
galactic longitude range 3° to 60° 417
Coronal hole dynamics 93
Effect of excited states on thermonuclear
reaction rates 583
Electron cyclotron maser emission near the
cutoff frequencies 725
Free fall onto magnetized neutron
stars 745
 H_2O masers in the galactic plane. I.
Longitude 340° to the galactic
centre 401
New H_2O masers associated with the
main-line OH masers in the galactic
longitude range 3° to 60° 443
Some properties of radio galaxies in
clusters 101
Structure of a sequence of two zone
polytropic stellar models with indices 0
and 1 453
Survey of OH masers at 1665 MHz. II.
Galactic longitude 340° to the galactic
centre 361
- Atomic and molecular physics and spectroscopy*
Boltzmann equation theory of charged
particle transport 163
Cross sections for electron-carbon
monoxide collisions in the range
1–4 eV 473
Determinantal representations for the
crystallographic point groups 485
Diffusion, attachment and attachment
cooling of thermal electrons in oxygen
and oxygen mixtures 831
- Drift and diffusion of electrons in an
atomic gas between closely spaced
electrodes. I. Theory for elastic
electron-atom collisions 27
Drift and diffusion of electrons in an
atomic gas between closely spaced
electrodes. II. Effect of inelastic
collisions 45
Drift velocity of electrons in nitrogen-argon
mixtures 297
Electron impact excitation cross sections for
B III 659
Excitation of swift heavy ions in foil
targets: visible radiation from Fe, Ni
and Cu 7
Kinetic theory analysis of electron
attachment cooling in oxygen 845
L-shell ionization of Sn and Gd by
20–100 keV electron impact 287
Relativistic corrections of closed-shell
atomic systems 61
Study of approximations for electron-atom
direct reactions 665
Thermal electron attachment to SF_6 and
 CFCl_3 15
Townsend discharges in transverse magnetic
fields 859
- Austern, N.—
See Amakawa, H. 633
- Ball, C. J.—
See Howard, C. J. 507
- Barclay, J. A.—
See Blamey, P. J. 127
- Barker, F. C.—
Isospin mixing in 4^- states of ^{12}C 649
- Batchelor, R. A.—
See Caswell, J. L. 401, 443
- Baxter, G. W., and Spicer, B. M.—
L-shell ionization of Sn and Gd by
20–100 keV electron impact 287
- Bingham, D.—
See Blamey, P. J. 127
- Biophysics*
Remarks on the motility and thermotactic
response of fibroblasts 707
- Blake, A. J.—
See Jacka, F. 221
- Blamey, P. J., Bingham, D., Barclay, J. A.,
and Cashion, J. D.—
Nuclear orientation of ^{152}Eu in gold 127

- Blevin, H. A., and Brennan, M. J.—
Townsend discharges in transverse
magnetic fields 859
- Box, Michael A.—
Power series expansion of the Mie
scattering phase function 701
- Brennan, M. J.—
See Blevin, H. A. 859
- Brown, G. E.—
The quark presence in nuclei 591
- Brown, R. A.—
Effective Hamiltonians and wavefunctions
for electrons in deformed crystals 321
- Buckingham, M. J.—
Correlations, long range order and
dimensionality 683
- Cashion, J. D.—
See Blamey, P. J. 127
Ti, S. S. 185
- Caswell, J. L., Batchelor, R. A., Forster, J. R.,
and Wellington, K. J.—
H₂O masers in the galactic plane. I
Longitude 340° to the galactic centre
401
New H₂O masers associated with the
main-line OH masers in the galactic
longitude range 3° to 60° 443
- Caswell, J. L., and Haynes, R. F.—
Atlas of main-line OH masers in the
galactic longitude range 3° to 60° 417
Survey of OH masers at 1665 MHz. II.
Galactic longitude 340° to the galactic
centre 361
- Chakraborty, B.—
See Paul, S. N. 67
- Chakraborty, B., and Paul, S. N.—
Method of averaged Lagrangian for
precessional rotation and other
complementary effects of waves in
nonlinear plasmas 867
- Clancy, B. E.—
See Donnelly, I. J. 305
- Clark, P. E.—
See Ti, S. S. 185
- Clay, R. W., and Gerhardt, P. R.—
Cosmic ray showers at 10¹⁶ eV 357
- Clay, R. W., Gregory, A. G.,
Gerhardt, P. R., and Thornton, G. J.—
Comment on the cosmic ray energy
spectrum in the light of results from
atmospheric Cerenkov studies 227
- Collins, R. E.—
See McPhedran, R. C. 197
- Collocott, S. J.—
A simple microcomputer-controlled
calorimeter: the heat capacity of copper,
Invar and RbNiCl₃ in the range
2–20 K 573

Condensed matter

- Australian high resolution neutron powder
diffractometer 507
- Deformation dipole model for crystals:
application to NaCl 897
- Dynamics of a nonlinear diatomic
chain 339
- Effect of lattice discreteness on the
linewidth of the electron spin resonance
of local moments in metals 501
- Effective Hamiltonians and wavefunctions
for electrons in deformed crystals 321
- Elastic and inelastic scattering of gamma
rays from V₂Si 185
- Estimation of single crystal integrated X-ray
intensity within a designated ($\Delta\omega, \Delta 2\theta$)
domain 79
- Fast-response EBIC system 565
- Room temperature elastic constants of
caesium thiocyanate 85
- Simple microcomputer-controlled
calorimeter: heat capacity of copper,
Invar and RbNiCl₃ in the range
2–20 K 573
- Spin glasses in transition? 519
- Structural transformations and their
precursors 553
- Transport properties of nearly magnetic
alloys and metals 537

Cosmic rays

- Comment on cosmic ray energy spectrum in
the light of results from atmospheric
Cerenkov studies 227
- Cosmic ray showers at 10¹⁶ eV 357
- Estimate of the flux of free quarks in high
energy cosmic radiation 717

- Cramer, N. F., and Donnelly, I. J.—
The excitation of ion-acoustic waves by a
magnetic pump in cylindrical
geometry 675
- Crompton, R. W.—
See Hegerberg, R. 831
- Crompton, R. W., and Haddad, G. N.—
Thermal electron attachment to SF₆ and
CFCl₃ 15

- Dalitz, R. H., and Deloff, A.—
The strangeness-exchange reaction
K⁻d → Aπ⁻ in flight 617
- Davis, R. L.—
See Howard, C. J. 507
- Deloff, A.—
See Dalitz, R. H. 617

- Di Marzio, F., and Amos, K.—
An analytic distorted wave approximation
for intermediate energy proton
scattering 135
- Donnelly, I. J.—
See Cramer, N. F. 675
- Donnelly, I. J., and Clancy, B. E.—
The spatial Alfvén resonance in a
collisional plasma 305
- Duff, K. J., and Salib, E. H.—
Determinantal representations for the
crystallographic point groups 485
- Elcombe, M. M.—
See Howard, C. J. 507
- Electromagnetism and optics*
Power series expansion of the Mie
scattering phase function 701
- Finlayson, T. R.—
Structural transformations and their
precursors 553
See also Irving, M. A. 85
Ti, S. S. 185
- Fluid dynamics and plasma physics*
Excitation of ion-acoustic waves by a
magnetic pump in cylindrical
geometry 675
Method of averaged Lagrangian for
precessional rotation and other
complementary effects of waves in
nonlinear plasmas 867
Radius ratios of argon pinches 891
Solenoidal excitation of eigenmodes in
cylindrical magnetized plasma with two
ion species 491
Some applications of transformation to the
space-independent frame in the processes
of strong radiation in plasmas 67
Spatial Alfvén resonance in a collisional
plasma 305
- Forster, J. R.—
See Caswell, J. L. 401, 443
- Ganas, P. S., Aryafar, M., and Gately, L. P.—
Electron impact excitation cross sections for
B III 659
- Gately, L. P.—
See Ganas, P. S. 659
- General relativity and gravitation*
Counterpart of the Kasner model in
Brans-Dicke theory 235
- Gerhardy, P. R.—
See Clay, R. W. 227, 357
- Glass, R.—
Relativistic corrections of closed-shell
atomic systems 61
- Goswami, G. K.—
See Johri, V. B. 235
- Green, H. S.—
See Jarvis, P. D. 123
- Gregory, A. G.—
See Clay, R. W. 227
- Gridnev, K. A., Hefter, E. F., Mikulaš, K.,
Semjonov, V. M., and Subbotin, V. B.—
Elastic scattering of heavy ions and the
compressibility of nuclear matter 155
- Haddad, G. N.—
Drift velocity of electrons in nitrogen-argon
mixtures 297
See also Crompton, R. W. 15
- Haddad, G. N., and Milloy, H. B.—
Cross sections for electron-carbon
monoxide collisions in the range
1-4 eV 473
- Hay, H. J., Newton, C. S., and
Treacy, P. B.—
Excitation of swift heavy ions in foil
targets: visible radiation from Fe, Ni
and Cu 7
- Haynes, R. F.—
See Caswell, J. L. 361, 417
- Hefter, E. F.—
See Gridnev, K. A. 155
- Hegerberg, R., and Crompton, R. W.—
Diffusion, attachment and attachment
cooling of thermal electrons in oxygen
and oxygen mixtures 831
- Henry, B. I., and Oitmaa, J.—
Dynamics of a nonlinear diatomic
chain 339
- Hewitt, R. G., and Melrose, D. B.—
Electron cyclotron maser emission near the
cutoff frequencies 725
- Hicks, T. J.—
Spin glasses in transition? 519
- Howard, C. J., Ball, C. J., Davis, R. L., and
Elcombe, M. M.—
The Australian high resolution neutron
powder diffractometer 507
- Irving, M. A., Prawer, S., Smith, T. F., and
Finlayson, T. R.—
The room temperature elastic constants of
caesium thiocyanate 85
- Jacka, F., and Blake, A. J.—
A lamp for cancer phototherapy 221

- Jarvis, P. D., and Green, H. S.—
Generalized statistics and the rishon hypothesis 123
- Johri, V. B., and Goswami, G. K.—
Counterpart of the Kasner model in Brans-Dicke theory 235
- Kaiser, A. B.—
Transport properties of nearly magnetic alloys and metals 537
- Kieu, T. D., and Sy, W. N.-C.—
Solenoidal excitation of eigenmodes in cylindrical magnetized plasma with two ion species 491
- Lee, S.—
Radius ratios of argon pinches 891
- Lindesay, James V.—
See Noyes, H. Pierre 601
- McCarthy, I. E., and Stelbovics, A. T.—
Study of approximations for electron-atom direct reactions 665
- McCusker, C. B. A.—
An estimate of the flux of free quarks in high energy cosmic radiation 717
- McKay Colette M.—
See McKellar, Bruce H. J. 607
- McKellar, Bruce H. J., and McKay, Colette M.—
Formal scattering theory for energy-dependent potentials 607
- McKenzie, D. R.—
See McPhedran, R. C. 197
- Mackey, D. J. M.—
See McPhedran, R. C. 197
- McMahon, D. R. A.—
Drift and diffusion of electrons in an atomic gas between closely spaced electrodes. I. Theory for elastic electron-atom collisions 27
Drift and diffusion of electrons in an atomic gas between closely spaced electrodes. II. Effect of inelastic collisions 45
The Boltzmann equation theory of charged particle transport 163
- McPhedran, R. C., Mackey, D. J. M., McKenzie, D. R., and Collins, R. E.—
Flow distribution in parallel connected manifolds for evacuated tubular solar collectors 197
- Mahanty, J.—
See Richardson, D. D. 897
- Maier, F. J.—
See Rossouw, C. J. 565
- Mathieson, A. McL.—
Estimation of single crystal integrated X-ray intensity within a designated ($\Delta\omega, \Delta 2\theta$) domain 79
